DETAILED ACTION

Election/Restrictions

1. Claim 1-26 are allowable. Claims 2, 3, 8, 13, 14, and 18-21, are previously withdrawn from consideration as a result of a restriction requirement, require all the limitations of an allowable claim. Pursuant to the procedures set forth in MPEP § 821.04(a), **the restriction requirement among inventions of species 1, 2, and 3, as set forth in the Office action mailed on 4/3/06, is hereby withdrawn** and claims 2, 3, 8, 13, 14, and 18-21 are hereby rejoined and fully examined for patentability under 37 CFR 1.104. In view of the withdrawal of the restriction requirement, applicant(s) are advised that if any claim(s) including all the limitations of an allowable claim is presented in a continuation or divisional application, such claims may be subject to provisional statutory and/or nonstatutory double patenting rejections over the claims of the instant application. Once the restriction requirement is withdrawn, the provisions of 35 U.S.C. 121 are no longer applicable. See *In re Ziegler*, 443 F.2d 1211, 1215, 170 USPQ 129, 131-32 (CCPA 1971). See also MPEP § 804.01.

Allowable Subject Matter

2. Claims 1-26 allowed.
3. The following is an examiner's statement of reasons for allowance: The prior art fail to disclose the airbag retention collar as recited in claims 1 and 10. More specifically, the prior art fails to disclose the bent plate, the first and second mounting flanges, the diffuser flange, and the plate opening that is disposed between the diffuser flange and the first mounting flange, wherein the inflator diffuser extends through the plate opening.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Yoshioka et al. discloses an airbag retention collar comprising a bent plate (5), first (left flange of bent plate in Figure 1) and second (right flange of bent plate in Figure 1) mounting flanges, a diffuser flange (52), and a plate opening (52) that is disposed between the diffuser flange and the first mounting flange.

Williams discloses a bent plate (20), first (28b) and second (flange on opposite side of flange 42a) mounting flanges, a diffuser flange (42a), and a plate opening wherein the diffuser (62) extends therethrough.

Amamori, Dahmen, Yakota et al., and Igawa et al. disclose similar airbag retention collars.
